| Name (姓名)         | WONG Suk Fan 黃淑芬 | Sex (性別)          | Female 女              |
| Age (年齡)          | 38               | Department (就診科室) | Family Medicine 家庭醫學科 |
| Visit Date (就診日期) | 2026-06-09       | Hospital (醫院)     | Kowloon Family Clinic |

### Chief Complaint (主訴)

Referred for elevated triglyceride noted on recent blood test; no associated symptoms.  
因近期血液檢查提示甘油三酯偏高轉介覆診，暫無不適症狀。

### History of Present Illness (現病史)

Patient underwent routine blood test on 2026-06-02 (Report No. AT-2026-118824) showing Triglyceride 2.1 mmol/L (elevated, reference 0.56-1.7). Total cholesterol, HDL-C and LDL-C within normal range. Patient is asymptomatic, denies chest pain, palpitations, or dyspnoea. No prior lipid-lowering medication use.

病人於2026-06-02接受常規血液檢查（報告編號AT-2026-118824），結果顯示甘油三酯2.1 mmol/L（偏高，參考範圍0.56-1.7），總膽固醇、高密度及低密度脂蛋白膽固醇均在正常範圍。病人無自覺症狀，否認胸痛、心悸或氣促。過往無使用降脂藥物紀錄。

### Past History & Other Medical History (既往史和其他病史)

Unremarkable. No history of diabetes, hypertension or cardiovascular disease. 既往史無殊，無糖尿病、高血壓或心血管疾病病史。

### Drug Allergy History (藥物過敏史)

No known drug allergy (NKDA). 無已知藥物過敏。

### Physical Examination (查體)

BP 118/76 mmHg, Pulse 72 bpm, BMI 21.1. Heart and lung sounds clear, abdomen soft and non-tender. No xanthelasma or xanthoma noted.

血壓118/76 mmHg，脈搏72次/分，身體質量指數21.1。心肺聽診正常，腹部柔軟無壓痛，未見黃色瘤。

### Auxiliary Examination (輔助檢查)

Refer to attached Blood Test Report (Report No. AT-2026-118824) for full lipid panel. 詳見附上血液化驗報告（編號AT-2026-118824）之完整血脂數據。

### Diagnosis (診斷)

Mild Hypertriglyceridemia 輕度高甘油三酯血症

### Initial Diagnosis (初步診斷)

Mild Hypertriglyceridemia, likely diet-related 輕度高甘油三酯血症，考慮與飲食習慣相關

## Treatment Plan (治療計劃)

Advised dietary modification (reduce fat and refined carbohydrate intake), increase physical activity. Recheck lipid profile in 3 months; consider statin therapy if triglyceride remains elevated.

建議調整飲食（減少脂肪及精製碳水化合物攝取），增加運動量。三個月後覆查血脂；若甘油三酯持續偏高，將考慮處方降脂藥物。
